Art Unit: 3761

DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-7, drawn to A method of establishing and nurturing a business relationship, classified in class 705, subclass 14.
 - II. Claims 8-19, drawn to An absorbent article, classified in class 604, subclass 385.05.
 - III. Claims 20-24, drawn to A package of absorbent articles, classified in class 206, subclass 440.
 - IV. Claim 25, drawn to A laminated structure, classified in class 428, subclass 40.1.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions (II-IV) and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as a process of absorbing body fluids.

3. Inventions III and (II and IV) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not

Art Unit: 3761

require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require an absorbent article having an adhesive coating on a particular surface for attachment to any surface and a covering which has indicia on a particular side as claimed in the Group II and IV claims which serve as evidence claims. The subcombination has separate utility such as direct attachment to the human body.

- Inventions VI and II are related as combination and subcombination. Inventions in this 4. relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require an absorbent body. The subcombination has separate utility such as bandage or sanitary napkin.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to diverging fields of search, restriction for examination purposes as indicated is proper.
- A telephone call was made to David E. Crawford, Jr. on 3-5-03 to request an oral election 6. to the above restriction requirement, but did not result in an election being made

Application/Control Number: 10/003,077 Page 4

Art Unit: 3761

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. M. Reichle whose telephone number is (703) 308-2617. The Examiner's regular work schedule is Monday-Thursday. The Official RightFAX number is 703-873-9302.
